MYCOMMAND BY VEIGEL

MULTI-FUNCTION STEERING DEVICE

MyCommand by **Veigel** is a multi-function steering device. It's both a grip for controlling the steering wheel, and a button console for operating vehicle functions. With one hand, a driver can steer while managing electronic functions such as the windshield wipers, turn signals, horn, and headlights. The buttons are easy to press and are illuminated in the dark. **MyCommand** is weighted and swivels, so that it can be used in any steering wheel position. **MyCommand** is suitable for both right-handed and left-handed drivers.

FEATURES

- Ergonomic design
- Simple and safe to operate - has been airbag tested
- Illuminated function keys making it easier to operate in the dark
- Weighted - to maintain the correct position after device has been released
- Removable when not in use, by means of a quick-release base
- Original vehicle operating functions remain intact

APPLICATIONS

This product is specific to each vehicle and is capable of connecting via CAN-Bus, Multiplex or conventional wiring.

INSTALLATION

Unit can normally be installed within 4-6 hours, depending on the vehicle. An installation manual and a clear wiring diagram are supplied so that the system can be integrated to the vehicle
